SUMMARY

I am a professional software engineer seeking an opportunity at a multinational organization to further enhance my skills and contribute to the growth and innovation of the software industry.

WORK EXPERIENCE

Infocabs Global Limited
Dec 2021 - Present

Sr. Software Engineer
- Spearheaded the development and delivery of new features for the company's frontend applications, ensuring high-quality, user-friendly, and scalable solutions.
- Specialized in creating interactive and responsive web applications using modern frontend technologies such as Angular and TypeScript.
-
- Collaborated with cross-functional teams, including designers and backend engineers, to ensure consistent and functional product delivery.
- Responsible for troubleshooting, maintaining, and optimizing existing systems, improving both user experience and performance.

SMSami Inc.
Jun 2020 - Dec 2021

Angular Developer
- Built scalable and maintainable frontends using Angular and TypeScript.
- Delivered new features with a focus on performance and clean architecture.
- Collaborated on UI/UX improvements and testing automation.

SMSAMI Inc.
Sep 2019 - May 2020

Test Automation Engineer
- Designed and implemented end-to-end test automation using Protractor for Angular applications.
- Developed reusable test components to streamline test creation and maintenance.
- Collaborated with developers to ensure robust testing coverage and early bug detection.
- Contributed to CI/CD pipelines for automated test execution.

EDUCATION

City University of Science & Information Technology
September 2019 - December 2022

MS - Software Engineering - 3.50

BS - Software Engineering - 3.54

PROJECTS

EVOP 🔗
Dec 2021 - Present

Developed a real-time web application for operators in the UK to book cabs for customers.
- Implemented using Angular 18
- Used NGXS for scalable and maintainable state management
- Designed responsive UI for fast and efficient operator workflows
- Integrated real-time updates and smooth booking handling to enhance user experience
- Enabled live driver tracking with OSM and Leaflet
- Ensured optimal performance with lazy loading and modular architecture
- Collaborated closely with backend team to integrate RESTful APIs and ensure data consistency

Flyaway Hub - Cloud-based MIS 🔗

June 2020 - December 2021

Developed a flexible and scalable Management Information System (MIS) tailored to meet the complex requirements of the aviation sector.
- Leveraged modern JavaScript frameworks for modular and maintainable architecture
- Delivered a robust, cloud-hosted solution with enhanced performance and usability

ERetail Point - Cloud-Based POS Dashboard 🔗

June 2020 - December 2021

Contributed to the development of E-Retail Point, a cloud-based Point of Sale (POS) system designed to assist businesses in managing in-store and online sales, tracking inventory, processing payments, and accessing real-time reports.
- Developed responsive and user-friendly interfaces using Angular 12.
- Implemented real-time sales analytics and reporting features.
- Collaborated with cross-functional teams to ensure seamless integration with backend services.
- Enhanced user experience by optimizing performance and ensuring scalability.

Ready To Munch - Online Food Ordering Platform 🔗

June 2020 - December 2021

- Led a cross-functional team in developing a cloud-based online food ordering application, enabling customers to browse local restaurants and place orders seamlessly.
- Oversaw project planning and execution, ensuring timely delivery of features and maintaining high-quality standards
- Collaborated with backend teams to integrate real-time order tracking and payment processing features.
- Mentored junior developers, fostering a collaborative and productive team environment.

Ziggy Jobs - On-Demand Workforce Platform

September 2019 - May 2020

- Developed and maintained automated test scripts for the ZiGGY Jobs platform, ensuring the reliability and functionality of the application.
- Utilized Protractor to perform end-to-end testing, validating user interactions and workflows within the application.
- Collaborated with the development team to identify and resolve defects, contributing to the overall quality of the product.
- Integrated automated tests into the CI/CD pipeline, facilitating continuous testing and faster release cycles.
- Contributed to the creation of test plans and test cases, aligning with project requirements and ensuring comprehensive test coverage.

Motorway Express – Luxury Intercity Bus Service 🔗

May 2020 - December 2021

- Led the development team in creating a cloud-based booking and scheduling platform for Motorway Express, enhancing the customer experience for passengers traveling between Peshawar, Islamabad, Rawalpindi, Swat, and Abbottabad.
- Architected and implemented the frontend using Angular 12, ensuring a responsive and user-friendly interface across various devices.
- Collaborated with backend teams to integrate real-time scheduling, seat reservation, and payment processing features.

SKILLS

- Languages: JavaScript, TypeScript
- Frameworks/Libraries: Angular (18), Bootstrap, Angular Material, PrimeNG, OSM Maps, Leaflet
- Test Automation: Protractor
- APIs: REST APIs

- Web Technologies: HTML5, CSS
- Version Control: Git, GitHub, Bitbucket, AWS CodeCommit
- Management Tools: Jira, AWS
- Development Tools: Visual Studio Code, Visual Studio
